Creating a Template

In order for the data collected in the Google Form to be placed in an easier to read Google Doc, you need to create a Template of the form in Google Docs. Once this is done, it is easy to make a copy of the template for more students. You can format the Template any way you would like!

The << >> symbols will tell Template to add the information here! The information between the symbols has to be exactly how it is written on the created Google Form!!

Classroom Based Assessment

Teacher: Behrendt, Mary

Date: 4/24/2018

Student Performance:
- Homework Performance: Average
- Use of Class Time: Below
- Class Participation: Average
- Test Performance: Below
- Peer Interaction: Average
- Respect for Others: Average
- Attendance/Tardiness: Average

The student’s present levels of performance and achievement in your content area (based on teacher created assessment, curriculum based assessment, etc):

Performance and achievement vary by the task. She is good working in the labs, but not very good at independent work.

The student’s strengths are:
Friendly and respectful.

The educational concerns I have about this student are:
Following thru on assignments and seeking help when needed. She also is very dependent on her lab partner to complete tasks that should be shared.

Current accommodations/modifications being utilized as per the IEP:
Tests in an alternative setting, Extra time on tests, Make sure directions are understood

Other Accommodations to Consider:
